

# NorthQ Solutions Company Descriptions

## 250 Characters

NorthQ Solutions boosts real estate efficiency through performance data collection and analysis, resulting in optimising system operations & facility management. We aid building owners in portfolio decarbonisation, distribution accounting and more.

## 600 Characters

NorthQ Solutions maximise real estate asset efficiency through in-depth collection and analysis of main meter, sub-meter, and system performance data.

As a strategic partner to building owners and developers, NorthQ drives operational savings and decarbonises new and existing residential and commercial properties. The innovative cross-system optimisation in HVAC & solar systems, ensures most optimal building operations. By holding all the energy and system performance data, NorthQ also supports distribution accounting, ESG compliance and other critical areas within portfolio and asset management.
